

BY THE E. M.

CONTINUING CAMP REPORTS

Saturday and Sunday the rain did fall and great was the witness there of. For meals we tried to dodge the showers and succeeded about once. When you are hungry you don't mind a raindrop or two though. Your food may get wet, but what's the odds? You have to drink anyway!

Monday was a work-day—all day. I don't like work, I suggest that we refrain from talking about Monday.

Tuesday was a big day. About 11 a.m. the Cubs arrived, 12:30 p.m. we left for Drumheller. Through arrangements made by Mr. Matthew Madison of the Drumheller Swimming Pool for us, Mr. Jamieson, manager of the Electric Light Plant showed us over the works and explained everything in detail. I must remark here that he was most considerate and kind to the boys. Following the inspection of the plant we had a most enjoyable splash in the swimming pool, then a short walk about town, and at 5:29 p.m. we had huge hamburgers, pie and orange chutney at a cafe in Drumheller. Mr. Drumheller, who was in the cafe, was very kind to Mr. Drumheller.

On behalf of the boys, I would like to thank those kind people—Mr. Madison, Mr. Jamieson, Mr. Drumheller and also those who so kindly provide transportation—for giving such a delightful day.

Wednesday morning—the week. The afternoon we received visitors and in the evening around the council fire a mock trial was held. Mr. Richard Garrett, who was present, was the defendant. The attorney for the crown, Patrol Leader Bill Giffen, stated (at the top of his voice) that Mr. Garrett should be better off if he were in hot at all. Eventually everyone in the court being proved in the wrong including his Lordship (Mr. C. H. Smith) who showed his approval of the whole proceedings by handing a lard pail with a stick and roaring "ordish" to which no one took any notice, the court adjourned to cocoa and stuff. Highly remarkable, very illuminating and intensely enjoyable! More next week.

TO PAY AUSTRIA'S DEBTS

LONDON—Germany assumed responsibility recently for the principal claims of annexed Austria for settlement of Germany's obligations to Great Britain. The agreement was on a strictly two-nation basis, excluding all other countries holding both German and Austrian bonds, and followed demands by financial circles that Britain commander German commercial credits here to pay interest. It is held should Germany continue to disavow Austrian obligations.

DISTRICT CHAMPIONS
DIVIDE HONORS HERE
IN DOUBLES PLAY-OFF

Many Entries From Towns in
Tennis District No. 5

The postponed Doubles of the District No. 5 Tennis Championships were held at Carbon on July 17th and the honors were divided. E. Code and A. Anderson of Drumheller were the Men's Doubles; J. Spence and Miss A. Lemay of Carbon won the Women's Doubles; and Dr. J. Giffen and Miss M. Freeman of Strathmore won the Mixed Doubles.

The entry was representative of the district, players competing from Acme, Bashaw, Bassano, Calgary, Carbon, Drumheller, Delburne, Swallow, Strathmore and Trochu.

The following are the results and scores:

Men's Doubles—W. Thiberg and S. Jamieson, defeated F. Goren and N. Nash and F. Poxon, Carbon, 6-2, 6-4. E. Code and D. Anderson, Drumheller, defeated H. Longstaff and A. Gore, Swallow, 6-2, 6-4.

Quarter-Finals—C. Poxon and H. Edwards, Carbon, defeated F. Goren and N. Nash, 6-2, 6-4. W. Thiberg and S. Jamieson, Drumheller, defeated G. Watson and J. Hawkins, Drumheller, 6-2, 6-1. E. Code and D. Anderson won by default.

Semi-Finals—W. Thiberg and S. Jamieson defeated C. Poxon and H. Edwards, 6-2, 6-3. E. Code and D. Anderson defeated C. Poxon and H. Edwards, 6-2, 6-4.

In the final of the Men's Doubles E. Code and D. Anderson, Drumheller, defeated W. Thiberg and S. Jamieson, Drumheller, 6-2, 6-4.

Women's Doubles—Miss S. Morgan and M. Hume, Bashaw, defeated Miss S. Morgan and Miss Storey, Delburne, 6-3, 6-1. Miss O'Neill and Mrs. Hawkins, Drumheller, defeated Mrs. Woodland and Miss Powers, Swallow, 6-3, 6-1. Mrs. J.C. Spence and Miss Lemay, Carbon, and Miss Lannon and Miss Connolly, Drumheller, received byes.

Semi-Finals—Miss S. Morgan and Miss Hume 6-3, 6-5. Misses Lannon and M. Connolly defeated Miss M. O'Neill and Mrs. Hawkins, 6-5, 6-6.

In the final game Mrs. Spence and Miss A. Lemay, Carbon, defeated the Misses Lannon and M. Connolly, Drumheller, 6-1, 6-4.

Gore and Miss Powers, Swallow, won by default. F. Poxon, Carbon, and Miss Morgan, Bashaw, defeated Mrs. F. Goren and Miss Storey, Delburne, 6-1, 6-2. S. Jamieson and Miss Lannon, Drumheller, defeated H. Edwards, Carbon, and Miss M. Hume, Bashaw, 6-5, 6-3. W. Thiberg and S. Jamieson, Drumheller, defeated C. Poxon and Mrs. Spence, Carbon, 6-1, 6-0. J. Giffen and Miss M. Freeman, Strathmore, defeated J. Hawkins and

LOCAL TEACHER SLUGGED

The daily papers last Friday carried a story of an Alberta teacher who was lured by two young ladies to one of Toronto's bathing beaches and then pounced upon by two men and knocked into unconsciousness. No mention of the crime is given, but it is expected that robbery was the motive.

From information available it is thought that the John Macdonald referred to in the news story is that of the Carbon public school staff.

THE WORLD OF WHEAT
REVIEWED WEEKLY BY
MAJOR H.C.G. STRANGE

The Canadian Seed Growers' Association met towards the end of June for what was its 38th Annual Convention.

Thousands of farmers will no doubt have read this announcement in the papers and will think perhaps it is of little or no concern of theirs.

The fact is, however, that if thirty eight years ago the late Sir William Macdonald and Mr. George H. Clark, who are recently was Seed Commissioner of Canada, had not had a remarkable vision about seed selection, it is quite possible that the wheat which would not have the reputation of being the best in the world, and that consequently much less wheat each year would have been exported, and that the population of Western Canada would be considerably smaller than it is.

Members of the Canadian Seed Growers' Association, for thirty-eight years, have maintained and state such important varieties as Red Fife and Marquis wheat, and have made large quantities of pure seed of these varieties available to farmers.

The Canadian Seed Growers' Association, I suggest, deserves well of every farmer, and that those who depend upon farmers for a living, in Western Canada, for it has made through the efforts of its members, vitally important contributions to wheat production and advancement of Canadian agriculture.

Following factors have tended to raise prices:

Rise in the United States. Continental port stocks very small. Norway purchases new crop, wheat, year 1933 wheat crop of China, India and Japan considerably smaller than 1932-36 average. Heavy rains retard Kansas harvest. Nebraska to create a corn food reserves.

ALBERTA FARM WEALTH

A figure of \$675,000,000 was recently advanced by Leonard E. Peel of the Alberta Wheat Pool as the value of the agricultural land in Alberta. Of this, land value exclusive of the agricultural land was represented by 115 millions, and live stock and machinery made up the balance. No doubt that he doubted if any other nation has a production record on a per capita basis to compare with that of Alberta farmers for an equal number of years. He went on to say that the agricultural production normally furnished almost three-quarters of a million of the province's total annual wealth production.

As 60 per cent of the Alberta population is engaged in agriculture the welfare of this industry is essential to the prosperity of the population as a whole.

SET THANKSGIVING DAY

OTTAWA—A proclamation fixing Thanksgiving Day this year for October 16th, the second Monday in October, has been published last Wednesday in the Canada Gazette.

Mrs. Hawkins, Drumheller, 6-2, 6-5. D. Anderson, Drumheller, and Miss M. Nash, Carbon, defeated E. Code, Drumheller, and Miss Math-Carbon, 6-3, 6-3. N. Nash and Miss A. Lemay, Carbon, defeated H. Longstaff and Mrs. Woodland, Swallow, 6-0, 6-1. G. Watson and Miss Connolly, Drumheller, defeated C. W. Storey and Mrs. Storey, Delburne, 6-4, 6-3.

Quarter-Finals—F. Poxon and Miss Morgan defeated A. Gore and Miss Lannon, defeated W. Thiberg and S. Jamieson, 6-2, 6-4. J. Giffen and Miss M. Freeman defeated J. Hawkins and

Semi-Finals—S. Jamieson and Miss Lannon defeated F. Poxon and Miss Morgan, 6-2, 6-5. J. Giffen and Miss Freeman defeated N. Nash and Miss A. Lemay, 6-3, 6-1.

In the final of the Women's Doubles, Mrs. Spence and Miss A. Lemay, Carbon, defeated Mrs. Woodland and Miss Powers, Swallow, 6-3, 6-1.

In the final of the Mixed Doubles, J. Giffen and Miss M. Freeman, Strathmore, defeated S. Jamieson and Miss Lannon, Drumheller, 6-3, 6-5. (decided on one set on account of darkness).

SPORTS

Carbon Defeats Three Hills

The Carbon Junior Baseball team journeyed to Three Hills last Friday night where they played the Three Hills' Juniors, and the local boys won out, the final score being Carbon, 4; Three Hills, 1.

Carbon and Nacmnie Tie

In double-header baseball game at Carbon on Sunday between the Carbon and Nacmnie Junior teams, a mudlock occurred when each team won a game. In the first game Carbon defeated Nacmnie 9-7. In the second game in the evening the Nacmnie boys turned the tables and defeated Carbon 7-5.

Drumheller Miners Defeat Seniors—The Carbon Senior Baseball team played at Drumheller Sunday afternoon against the Carbon Miners and were defeated 10-8 in a close game.

The game between the two teams will be played at Carbon on Wednesday. Full account next week.

Carbon Defeats Beiseker

In a highway league baseball game played at Beiseker last Friday evening, the Carbon Junior team of Carbon and Beiseker, the local boys won out over their league rivals 5-4.

LONG YEARS AGO

July 21, 1927

Carbon was favored with a clear day for its sports on Wednesday and a large crowd turned out for the occasion.

The baseball game at the sports began at 2:30 p.m. and was ended in a brawl, the game being awarded to Swallow, 6-5.

Word reached Carbon that Miss Nora Kettleson and George McNeill were married in Calgary last night.

Mrs. H.N. Elliott and Mrs. M. Poxon left Tuesday for a month's visit in the Pacific coast.

Messrs. A. Gorin, D. Charlebois and two sons, Art and Eugene, returned Wednesday from an inspection trip to the Peace River country.

LITTLE NEWS ITEMS OF
INTEREST TO READERS

Little Edith Todd entertained her friends last Saturday afternoon, the occasion being her fifth birthday.

Mrs. Margaret Reid was a Calgary visitor last week.

S. F. Torrance and A.F. McKibbin spent the week end visiting with their families who are holidaying at Sylvan Lake.

R. Skerry took in the latter part of the Stampede in Calgary last week.

The Lady Roberts Chapter I.O.D.E. held a farewell tea on Wednesday afternoon at the home of Miss Myrtle Olliphant, for Mrs. C.H. Smith who was presented with a silver souvenir spoon with best wishes from the Chapter.

A fairly heavy shower of rain fell over the district on Tuesday night, and was accompanied by considerable lightning.

Mr. and Mrs. C.H. Nash and Mr. and Mrs. C.H. Ryan left Sunday to visit with friends at Kitchissippi.

Mr. and Mrs. C. Olliphant and Mrs. S. Poxon were Calgary visitors Saturday, taking in the Stampede.

Rev. and Mrs. Wm. McNicol were Carbon visitors Monday, on their way home to Calgary from Fred Dewar, where Mr. McNicol is preaching during July.

The Misses Palmy, Mary, and Margaret Amar returned to their home in Edmonton after spending the past week visiting in Carbon with their aunt, Mrs. L. Foxton.

20-PESS HILL WORTH ONLY \$2.00

A 20-pest Mexican hill looks very much like the Canadian 820 hill, and several Calgary cashiers have found this out to their sorrow. Assuredly someone well-splashed with the north-western Mexican money, passing them in Calgary during Stampede week, and Calgary police warned shopkeepers to examine closely the 820 bills. The 20-pest hill is worth about \$2 in Canadian money.

TRANS-ATLANTIC FLIGHT

DUBLIN, Ireland—Douglas G. Corrigan, 35-year-old Californian, caused a battered 8800 airplane into Baldoon Airport Monday after flying 3,510 unauthorised miles alone across the Atlantic from New York. He climbed from the cockpit of his nine-year-old plane into a circle of amazed Irishmen and announced calmly: "I'm Douglas Corrigan. Just got in from New York."

Corrigan plans to return to America by boat, although after his daring flight officials thought if given the chance he might attempt a return crossing.

LITTLE ITEMS OF
LOCAL INTEREST

Mrs. J.H. Olliphant was a Calgary visitor Thursday. Her daughter, Mrs. F. Barker returned with her to Carbon and spent a few days visiting in town.

Lindsay Elliott and son are visiting with Mr. and Mrs. W.B. Elliott.

C. H. Smith, our popular bank teller, received word last week that he was being transferred to Grande Prairie, and he expects to leave the first of next week for that town.

Mr. and Mrs. Otto Schiekler returned Sunday from a two weeks vacation spent at Pigeon Lake.

Pearl Kennedy of Turner Valley is visiting in Carbon with Mr. and Mrs. F. Emery.

Mrs. and Mrs. E.R. McIntosh, Lyle Bouck, Jim Rouleau, Norman Withers and Mrs. A. Strachan and their sons arrived in Carbon from Lethbridge on Sunday and visited for a short time with Mr. and Mrs. E.J. Rouleau.

Isador Guttman returned Sunday from a week's holiday at Banff.

The bridge club entertained on Tuesday evening at the home of Mr. and Mrs. Bruce Ramsay in honor of Mr. and Mrs. C.H. Smith, who leave soon to make their home in Grande Prairie.

Mrs. J. C. Spence visited this week at the home of Mr. and Mrs. Bruce Ramsay.

Mrs. J.J. Greenan of Calgary accompanied Mr. Greenan on his regular trip to Carbon last week end.

Mrs. and Mrs. Peter Nielsen and family of Victoria B.C. are renewing acquaintances in the district.

Mr. and Mrs. Frank Emery and Mr. M. Skerry returned to Carbon on Tuesday after spending a few days in Calgary.

Rev. and Mrs. McDonald returned to Carbon Friday night after spending the past five weeks on their motor trip to Missouri and other American States.

SUNDAY'S HAIL DAMAGE
SPREAD OVER A WIDE
AREA IN THE DISTRICT

Some Insurance Will Relieve
Burden Considerably

Hail—more dreaded that cutworms, death or grasshoppers in the Carbon district—struck its frenzied blow one more over a wide territory, extending from Inuitual to east of Carbon, damaging crops 100 per cent in its path and bringing a dismal future to many a grain farmer.

The hail struck Carbon about 9:30 p.m. Sunday night and while it did not do damage in town to any extent it took everything in its path from the northwest to the north-east, almost 100 per cent damage being reported by A. Shaw, H. Luft, D. Halstead and others, while W. Goulde, S. O'Rourke, S. McLeod and others more over a wide territory, extending from Inuitual to east of Carbon, damaging crops 100 per cent in its path and bringing a dismal future to many a grain farmer.

The hail struck Carbon about 9:30 p.m. Sunday night and while it did not do damage in town to any extent it took everything in its path from the northwest to the north-east, almost 100 per cent damage being reported by A. Shaw, H. Luft, D. Halstead and others, while W. Goulde, S. O'Rourke, S. McLeod and others more over a wide territory, extending from Inuitual to east of Carbon, damaging crops 100 per cent in its path and bringing a dismal future to many a grain farmer.

This same territory was visited by a severe hail storm last year, and crop loss in most cases is said to be almost complete, although the storm was in places.

The storm followed on the heels of the hottest day experienced here so far this year and the hail was accompanied by a high wind that helped to swell the damage. Hail stones as large as hen's eggs were reported in places and a heavy down pour for time with Mr. and Mrs. E.J. Rouleau.

A number of the farmers in the hatched area of Carbon reported before this year and many were insured with the Alberta Hail Board. Where the storm hit crops were generally excellent and would have produced in some cases 50 bushels or more to the acre.

Swallow and Acme districts report very damage from hail, although Three Hills reports no hail or rain in this storm.

LOCAL NEWS ITEMS

Francis Poxon spent the latter part of last week in Calgary.

Rev. and Mrs. McDonald motored to Edmonton on Monday to get their two children, who have been visiting in the northern city for several weeks with Mr. McDonald's sister.

Rev. S. Evans left Tuesday morning for Montreal where he will meet his bride-to-be, who is coming from the old country. The marriage will take place in Montreal and the happy couple expect to return to Carbon in about three weeks' time.

A Definite Program Needed

With the return to more nearly normal climatic conditions resulting in Western Canada at least, in larger returns from agricultural operations the time seems to have arrived when greater consideration will have to be given to a national policy which will secure a better balance in the future between the industrial and agricultural life of the country, than has hitherto existed.

It can be admitted forthwith that there is nothing new in the doctrine of a better balanced economic structure. The need has been recognized and voiced on previous occasions by statesmen, economists and politicians, not only in the recent depression days, but similar statements were made as far back as ten, fifteen and twenty years.

In the past, however, such injunctions have usually been regarded more or less in the nature of an academic or textbook theory, as an ideal perhaps to be kept in mind, but without any particular pressure being brought to bear as to the necessity for shaping all governmental, private and corporate activities towards this specific end.

Towards An Objective

Now, however, that the country is presumably on the threshold of an era of rehabilitation and recovery, it would appear highly desirable that the main objective for the future development of the country and, ergo, the prosperity and happiness of her people be not lost sight of, that whatever policies are devised to assist the people and the industries of the country to re-establish themselves on a self-dependent basis, they should all lead in the one direction—a more nearly balanced economic life.

Until this is done there can be, not only no guarantee, but not even a prospect, that there will be returned similar conditions to those from which the Dominion is now apparently emerging, at some time in the future, possibly not far distant, perhaps more remote.

In comparison with other industries it must be borne in mind that agriculture affords comparatively little chance of the masses of surplus production, under normal conditions, huge quantities of foodstuffs, the industry itself makes almost no provision for wagers to consume its products.

It is therefore essential that other industries, giving employment to a relatively large number of workers exist side by side with agriculture in order to ensure consumption locally of a larger percentage of the commodities produced by agriculture, if the latter is to prosper. The only alternative for an industry dependent upon remote markets of world-commerce character for the sale of the bulk of its products is to curtail production.

Now, while curtailment of production may, to some, appear expedient, it is a wasteful policy, difficult of attainment where output is largely dependent upon the vagaries of seasonal climatic conditions and above all, history has yet to record success in this field of experimentation. In other words, it is not the road to prosperity.

This being the case, the objective of those who have the welfare of the country at heart, and who are concerned with the masses of surplus production of the output of agriculture as close as possible to the source of production.

A Combined Aid

So far as Western Canada is concerned there are many ways in which this may be achieved, no one of them in itself a complete solution of the problem, but a combination of them, with each pressed to its ultimate possibilities, should go far towards placing agriculture on a more permanent and prosperous basis.

The solution of the problem of western agriculture appears to lie in the direction of greater consumption at home, of the products of the farm. It predicated among other things greater diversification of agriculture to ensure local markets for a greater percentage of the products of the farm. It suggested also that other industries, giving employment to a relatively large number of workers exist side by side with agriculture in order to ensure consumption locally of a larger percentage of the commodities produced by agriculture, if the latter is to prosper. The only alternative for an industry dependent upon remote markets of world-commerce character for the sale of the bulk of its products is to curtail production.

It also indicates the necessity of more vigorous prosecution in the search for and development of the natural resources with which the west is richly endowed, again providing more sources of employment and hence of greater consumptive ability.

As a further means to this end there is ample scope for research work into the possibilities of making greater use of agricultural products as raw materials in manufacturing processes, which in turn would open wider opportunities for diversification in agriculture and create more industries, hence, increase consumptive demands.

There are also possibilities in the further development of by-products from grain and other agricultural commodities now grown more or less extensively on Western Canadian farms, and with further research and experimentation some of these by-products could be made a commercial feasibility. There is in the western cities chemical and laboratory work which have done some work along these lines who are in entire accord with this statement.

A More Enduring Basis

These are only some of the possibilities which, if they were co-ordinated under some general national program, would go far towards re-establishment of the agricultural industry on a more certain basis than it has been in the past and which would go a long way towards softening the blow of future depression conditions.

Such policies pressed to an ultimate and logical conclusion with whole-hearted co-operation between all who are concerned with the future of the country would do much to promote prosperity and contentment and many of the "aunty" with which the people have recently been afflicted would vanish into thin air.

International Exhibitions

An international exhibition is a national and international exhibition, and stipulates that they can only occur once every six years. The next international exhibition cannot take place until 1941 under this agreement.

A "glean train" exhibited in London last two passenger coaches with walls, ceilings, floors, and fittings made of glass and 100,000 tiny mirrors covering the exterior.

I always wanted to be a blacksmith—it is a man's job, said Stanley Baldwin.

The wings of quennants are broken off after their nuptial flight.

Speed Of Fish

Can Reach A Speed Under Water Comparable With Land Animals

One reason why fish can reach a high speed for a comparatively small expenditure of energy is due to a little-known perfection of their make-up which was not fully understood till a few years ago. It was found that quite small fish, when held with their heads immersed in water, squirted through their gills a jet of water which rose several feet in the air.

A realization of what these jets meant came about in the following manner. A device, which claimed to reduce greatly the obstacles to the passage of a ship through the water, was invented by an American engineer. The invention was called an "induced stream-line system," and its main feature was the ejection of streams of water through nozzles in such a way as to overcome friction and water resistance.

The significance of the jets of water emitted by fish was then appreciated. They have had an "induced stream-line system" since the dawn of history. It was found that of over 300 species of swift-traveling fish which were examined, 90 per cent. possessed gill everts at the correct place for the most efficient jet of exhaled water.

When, in addition to this adjunct is added, it is remembered that the body of a swift-traveling fish is perfectly streamlined, its skin is so smooth that it offers practically no resistance to the water and that the beautifully moulded bullet-shaped head, with the pointed snout, is a perfect cut-water, it is not surprising that the water which comes through the water which compares not unfavorably with speeds reached by animals on land.

It is to be worth noting here that it is almost impossible to measure the fastest speeds of which certain fish are capable. A Mako shark, for example, has been filmed during a leap in which it put nearly 30 feet between itself and the water. The fastest speed must be what it attained to hurt its 600-pound body that distance out of the water.

It is hard to picture a sleek wooden ship with prodigious force. Its sword pierced through the 12 inches of white oak timber and the oak oak splintered 2½ inches thick. Finally, the sword entered an oak and broke off, thus forming a very convenient handle.

Although the fish had penetrated 20 inches of timber, judging by the amount of which the sword was composed it was obvious that by no ordinary means could it have been forced through copper sheathing and nearly two feet of steel. The fact of clean penetration showed that the fish, at the moment of impact, must have been travelling at a speed of 60 m.p.h.—From Discovery.

A Quaker Meeting

Quaint Ceremony Took Place In Long Island Meeting House

While the dust-drying the men and women in the Melrose Meeting House in Glen Cove, L. I. marched in a row. Florence Elizabeth Wilkins and Isaac Hicks, who were married on a plain wooden bench facing 200 guests. For several minutes there was no sound in the ancient frame building. At length, when the spirit moved them, Florence Wilkins and Isaac Hicks rose and faced each other. The man took the girl's hand, declared he would take her for his wife. The girl repeated the pledge. They were then down. Thereupon every person present signed a wedding certificate. That week, in traditional Quaker style, Isaac Hicks and Florence Wilkins became man and wife. Two plain a ritual for modern bride. It was only the second wedding ceremony the little Quaker meeting house, which was founded in 1720 and in which counts few youngsters in its congregation, had seen in 102 years—Time.

The Greatest Men

Are Quite Often Those Who Know Nothing

We heard a clergyman in London say, 11 years ago, that he had never known a man who knew nothing. He mentioned him, states The Argonaut, yet Mr. Spencer was living at the time less than five miles away and his works were in every London bookshop. Perhaps Sir Henry Taylor and Horace Drevelly were not far wrong in thinking that the speaker had known nothing of his greatest men.

England has more than 35,000 dramatic societies—one for every thousand persons.

Test Smoke Screens

Defense System For London To Guard Against Air Attacks

When and if bombs start dropping in the next war, London will face a tougher problem than when the Germans peppered the city from Zeppelins 20 years ago.

Officials say the defense system will have to strike a knock-out blow in the first week of the war to show enemy bombers lightning attacks are too costly.

Attacking planes probably will roar only 200 feet above rooftops—beneath the curtain of fire of anti-aircraft artillery.

To contract high attack and make low attack difficult the government is testing smoke screens to strengthen the balloon barrage it plans to throw around the city.

The screens would be flung up from generators placed at short intervals. A new camouflage department of the air raid precautions administration is co-operating with the Royal Air Force in camouflage tests on larger buildings.

In "A.R.P." the government has a camouflage scheme to protect civilians in bombing raids, and injured, fight gas attacks, and move non-combatant members of the population to safety areas.

But wide publicity hasn't popularized A.R.P. The war was not intended. Lack of co-ordination has been blamed mainly for failure to get recruits for anti-gas and first aid units.

Home office drafted a broad program and left municipal authorities to carry it out. But the latter had to wait weeks to begin training due to shortage of skilled instructors. Government officials are trying to whip up fresh enthusiasm for its big defense campaign.

SELECTED RECIPES

RASPBERRY SHORTCAKE

3 cups sifted Swans Down Cake Flour
3 cups Calumet Baking Powder
1 teaspoon salt
½ cup butter or other shortening
¾ cup milk
1½ quarts crushed, sweetened raspberries
Shift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk all at once and stir carefully until all flour is incorporated. This air vegetable oil mixture forms a soft dough of dough into balls. Brush with melted butter. Bake in hot oven (450 degrees F.) 10 to 20 minutes, until done.

To serve, separate halves, spread bottom half with soft butter and part of raspberries. Adjust top and spread with butter and raspberries. Garnish with whipped cream and other fruit berries. For 10 Strawberries may also be used.

TEA FLUFFS

1½ cups sifted Swans Down Cake Flour
1½ cups Calumet Baking Powder
1 teaspoon salt
4 tablespoons butter or other shortening
4 tablespoons sugar
2 eggs
1½ cups milk
Shift flour once, measure, add baking powder and salt, and sift again. Cream butter, add sugar, and cream thoroughly; then add egg and beat well. Add flour, alternately with milk, a small amount at a time, beating until smooth after each addition. Bake in greased small muffin pans in hot oven (425 degrees F.) 20 minutes. Makes 12.

Golden Fleece

Australia To Erect Bronze Statue To Merino Ram

Australia is to honor the sources of its golden fleece by erecting a bronze statue of a Merino ram on the summit of Mount Panamara, near Echuca, in Victoria. The statue will be about 11½ times life size and will be designed by an official of the Sydney Technical College. Out of the bronze will be shared by the Grazier's Association and the Sheep Breeders' Association. It is Australia's most valuable primary product—exports for the financial year 1930-37 totaling 622,304,567 (about \$25,000,000).

Not Eligible

A leaguer for the protection of hen-pecked husbands was being organized in small northern town, and at the first meeting a man named George was elected president. George had just taken the chair and banged the table for order when a tall, gaunt, alien-looking woman in thick black stockings and a black dress and seized him by the collar.

"You come home," she shouted, shaking him. "What business have you in a place like this? You are not here!"

Discovery Of New Star

Believed By Scientists To Be Hotter Than The Sun

Discovery of what may prove to be the hottest, densest, and at its maximum the brightest object ever known to mankind was pictured in national scientists in convention at San Diego.

It is a star weighing about 6,000,000 tons to the cubic inch. Only 60 miles in diameter but 400,000,000 times as bright as the sun at its zenith.

Prof. Fritz Zwicky suggested it may prove to be one of the most far-reaching proofs of Einstein's theory of general relativity. He described it to the annual convention of the Pacific division of the American Association for the Advancement of Science.

This super nova ("August star") was discovered last August at the new Palomar Observatory, which is to house the world's largest telescope in two years.

At its maximum it was the brightest object ever observed, 400,000,000 times as bright as the sun. Now it is a million times as bright as the sun, but has shrunk from the size of the sun to a collapsed neutron star only 60 miles in diameter. Its surface temperature, Professor Zwicky believes, may be at least several hundred thousand degrees.

Another Theory

Doctors Now Conclude Worry Will Cause Decay In Teeth

After careful study, Drs. A. L. Wrench and Barney Korchin, of Cornell University, have arrived at the conclusion that worry is one of the important causes of bad teeth. It is all quite simple too once you accept the premises and get the explanation.

Acid saliva is hard on enamel (that's orthodoxy). Saliva is naturally alkaline or basic, and as the mouth becomes dry. This signifies that the saliva flow has been cut. And with the lessening of the flow, the acid content increases. And with the increase of the acid content the little impurities which are responsible for decay (caries) to you get caught.

And soon the black spots on your molars are as numerous as the black spots before your eyes after a night with a sick friend. Obviously the cure is to keep your temper and cultivate a placid and contented state of mind.

This recipe sounds simple but is about as easy to follow as the Golden Rule. Merely being addressed periodically as "my friends" doesn't help much either.

Street Parking Forbidden

Cars Not Allowed On Quebec City Streets Overnight

Going their rounds, Quebec police are carrying bundles of small rectangular cards notifying motorists that overnight parking on the city's narrow streets has been prohibited.

The cards, which the constables place on every parked automobile read: "Warning. Owing to heavy traffic in our narrow streets, for your own protection against damage to your car and to facilitate circulation to the fire department, overnight parking is forbidden."

"Hoping that you will enjoy your visit in our city, we remain,

Police Headquarters."

In France all Customs notices appearing normally in other languages than French will in future be also in Esperanto.

At a recent international dog show held in England there were 92 breeds displayed.

Flies Are A Menace To Every Community

Take Precautions To Protect Children From Summer Epidemics

Here is something for every mother to read. It is a warning against the recognized medical authority, diarrhoea and enteritis (which are synonymous with summer diarrhoea) was the first cause of death amongst children, from the second to the twelfth month of life, in Canada during the period 1925 to 1929.

It is acknowledged in medical and scientific circles that common houseflies breed spots as they come, their bodies and may, therefore, introduce infections into foods on which they feed.

How important it is, then, to protect milk and other liquids, feeding bottles and other receptacles from flies during the period 1925 to 1929. It is acknowledged in medical and scientific circles that common houseflies breed spots as they come, their bodies and may, therefore, introduce infections into foods on which they feed. How important it is, then, to protect milk and other liquids, feeding bottles and other receptacles from flies during the period 1925 to 1929. Could Challenge World

English Authority On Music Finds Unusual Talent In Canada

Musically Canada can challenge the world. This from no less an authority than Dr. Harold Drake, of the Associated Board of Royal School of Music. "I have come into contact with a great many musical people on this tour," said Dr. Drake, "and I find very few talent in Canada, indeed as fine as in any part of the world." Dr. Drake has returned to England.

At Bakersfield in California is an oil well 15,000 feet, or nearly three miles deep. Oil is now flowing from the well, which is the deepest in the world. It is estimated to contain 2,500 barrels, 11,600 gallons, a day.

WORLD HAPPENINGS BRIEFLY TOLD

Mrs. E. Vornleya, Campbellford, Ont., claims a world record as a teacher. She has taught since she was 16 years old, a total of 66 years.

A 12-foot Indian python reported missing from a London house and for which police searched was found asleep behind a wardrobe in the house all the time.

One hundred and thirty convicts from the Kingston penitentiary have been distributed among various Canadian penitentiaries. The Kingston penitentiary was overcrowded.

Miss Ada Leat of Edmonton, Alta., was named president of the British Empire Club at the annual meeting held in International House, New York. Miss Jessie Casselman, Vancouver, was elected secretary.

Dr. Charles R. Dickson, 70, one of the earliest experts of X-ray, who was blinded by exposure to the ultra violet rays and in 1914 founded the Canadian Institute for the Blind, died recently in Toronto.

There were 6,000,000 pounds of creamery butter produced in Canada in June, an increase of seven per cent. over June, 1937, 41 per cent. May, 1938, a Dominion Bureau of statistics report said.

Venezuela, member of the League of Nations since 1920, had been giving no explanation of her action. Resignation from the League of Nations became effective two years after formal notification is given. Prospects at present were for a good year in the packing industry. President J. S. McLean told shareholders at the annual meeting of Canada Packers Limited, Directors were re-elected and reports adopted.

Check On Firearms

Registration Of Revolvers, And Pistols Is Made Necessary

Royal Canadian Mounted Police headquarters issued a statement urging the public to co-operate in enforcing the new amendment to the Criminal Code with registration of revolvers and pistols which was passed at the recent session of parliament.

The amendment requires persons possessing revolvers or pistols to register them between March 1 and July 1, 1939, and periodically every five years thereafter. In 1934, when registration of weapons was first made compulsory by parliament, provision was made for a periodical re-registration.

The amendment, the statement said, will have the effect of helping the public to decide whether they really desire to retain a gun, and if for the sake of protection, pistols and revolvers which may be stolen, and therefore may be a source of danger rather than protection. The law compels the registration of all pistols and revolvers, whether held as souvenirs or for any other purpose, in Canada and Britain, all dangerous weapons of this kind must be re-registered every three years.

The firearms registration section has proven helpful to various police forces throughout the Dominion in identifying firearms found at scenes of crimes or on persons arrested, the statement said.

Number Is Growing

Specialist Advises Six Meals Daily But Less Food

Science is undermining another ancient creed. The rule about not eating between meals has been questioned before this. One specialist at the Ottawa meeting of the Association for the Advancement of Science now says definitely six meals a day. This means, as our mathematically minded readers will see at once, the 42-meal week, or the rule that says that a meal per hour of work. Perhaps this is as pleasant a way as any of meeting the challenge of the new leisure.

There is one drawback. The specialist at Ottawa says six meals a day, but a total of only two-thirds as much food as one consumes now. But that, too, will be adjusted in time. As science continues to advance with mighty strides, upsetting on its way the science of to-day, we may confidently look forward to a world of tomorrow in which people will be urged to eat eight heavy meals a day.

An Early Mistake

Now that pine trees are being used for making paper and rayon for dresses it was a mistake to cut down the pines in the old lumbered to be seen into lumber, but the land had to be cleared and science had transformed the old pine trees into paper or dress goods in the pioneer days.

Deafness was brought to Rome from China as a gift to Marcus Aurelius.

Queerest Horse Races

Have Been Run Half Yearly In Italy Since 1721

One of the world's most queerest horse races, the Palo, was performed in a recent week in the municipal square at Biad, Italy.

Medieval pageantry surrounded the scene as banners and costumes of 600 years ago were mingled in the crowds of townsfolk.

Ten horses were chosen by lot to run for the honor of 30 of the town's 17 contradas, or wards. The Palo, or prize, is a huge silk banner.

Rules did not prevent the riders from beating one another's horses. The victors rode three times around a brick-paved tilted piazza. Matriesses padded some of the dangerous corners.

Police waited at the finish line—to protect the winner from friends and rivals alike. So fierce was rivalry once that inter-contrada marriages were difficult.

Such hysteria has passed but families still separate on Palo Day, the day when the contrada where he was born.

The course has been run uninterrupted twice a year since 1721. It dates back to the 14th century, however, and grew out of other games traceable to the 13th century.

For Firm Action

Anthony Eden Thinks British Should Take A More Positive Stand

"It is certainly not true to pretend that for this country to take firm action in defence of its own legitimate interests is the standard of international decency is to endanger peace," Anthony Eden, former secretary of state, said in a speech at Stratford-on-Avon.

"There must everywhere be still a reluctance to take the steps of war," he said, "but we hear them bark again. The bark has even become an accepted accompaniment of certain forms of diplomacy. In these conditions it is inevitable that there should be a difference of opinion in this country as to whether such action should be pursued. . . .

"Some of us would have preferred that this country should have taken more positive line in respect to events in the Mediterranean in the last six months. Whether we were right or wrong is a matter of opinion. . . .

"There is to my mind a preferable course to be taken. The present policy must be conditioned by certain principles of international conduct which we have always upheld and from which we cannot depart."

Study The Planet Venus

Scientists Seek Information About This Unknown World

Astronomers of Lowell Observatory at Flagstaff, Ariz., are observing how the clouds on the planet Venus for clues to what is happening on this unknown world which is the earth's twin in size.

The clouds completely cover Venus. But they change their shapes and colors from hour to hour, driven by furiously fast winds. With aid of a new method of analyzing their reflected light, they have become celestial clues that may reveal the mysterious forces beneath them.

Venus is the next planet inward toward the sun. At times she comes within 27,000,000 miles of the earth. Her diameter is about 7,700 miles. She has sufficient heat to maintain varied forms of life. Although whatever happens on her surface is veiled from telescopes, the clouds hold the key to much fascinating information.

It is apparent already from studies of these clouds with the spectroscopic that a day on Venus is probably more than two weeks long.

Dr. V. M. Slipher, director of the observatory, says the quality of light reflected from Venus' clouds suggests that they are made of dust.

Had No Objection

Chicago Policeman Not Afraid To Take Badge Number 13

For sixteen years the custodian of equipment in Chicago has endeavored to give police badge No. 13 to an officer. None would accept it until a few months ago when the badge, which was turned in his old and worn star, numbered 6988, and asked for a new one.

"And the suit goes a long way towards that 'something'."

So keep smiling. It may get you a rise or a better job.

In nine months Japan has inflicted proportionately as much damage on itself as on China.

SEW A COOL SLENDERIZER

By Anne Adams

Discover Oldest Records Of Human Life On This Continent

A wily, acorn-eating fellow who roamed the glacial and volcanic wastes of northern California at least 15,000 years ago apparently was the "dawn man" of North America.

He made only the crudest of tools. None had handles. And if he hunted in the conventional prehistoric manner he left no record of his prowess within reach of the scientific expedition which unearthed his trail.

He found no "dawn man" spear heads. The findings were disclosed by Mark Harrington, head of the joint expedition of the Southwest museum and the Carnegie Institution of Washington, upon completing several weeks of excavating on shores of salty Borax lake, 60 miles north of San Francisco bay.

Beliefs of four prehistoric cultures were unearthed on the lake shore, but as in other such discoveries there was no record of the hunter on himself. Only crude tools and weapons comprised of glass-like volcanic rock, called obsidian, and the remains of a bonfire. The "dawn man" knew how to keep warm in that age of glaciers, and perhaps how to cook a little.

The first culture found was that of the Folsom man, hitherto regarded as one of the oldest records of human life on the continent—10,000 to 15,000 years.

May Account For Success

Owner Of Paper Empire Never Makes Same Mistake Twice

Eric Gidson, a man of letters, in the Daily Sketch, when a few more signatures have been acquired to a few more documents, Eric Vanart Bowler will be the outstanding figure in the whole newspaper world. Less than 20 years ago his business was capitalized at about £100,000.

When the purchase of vast Newfoundland forests is complete his paper empire will be worth £17,000,000. He's only 42, tall of 6 ft. 1 in.

He has the 250 Surrey acres he calls pedigree hogs, spars and sheep, tries to grow enough to feed them. When he isn't pitching hay he shoots, rides or occasionally plays golf. He's not superstitious, but he never walks the same mistake twice which may account for his business success.

Shows Figure Of Late King

Eric Gidson says that the stained glass window that has been given to Winchester Cathedral by Americans, as a tribute to the life and character of King George V., contains a representation of the kneeling figure of the King, wearing the robe of the Order of the Garter.

Singing Mouse Is Dead

Mickey, the singing mouse, is dead. Mickey's song was stifled in a cage at the home of Mr. and Mrs. Frank Weaver, Ollie, Indiana, where he was kept.

And the suit goes a long way towards that "something."

So keep smiling. It may get you a rise or a better job.

In Germany there are bee farms where the insects are raised for their poison. It is extracted and sold as a cure for rheumatism.

RALPH LOCKS RATHER ANNOYED

Defeated by Denny Shute, left, in a 35-hole match play contest to decide the unofficial provincial golf championship of the United States, Ralph Guldahl, national open champion, looked rather annoyed as the two walked off the course at Bingham Mass.

SUNDAY SCHOOL LESSON

WEDNESDAY JULY 24

GIDSON: FOLLOWING GOD'S PLAN

Golden text: He stood not I commandment? He strong and of good courage. Joshua 1:9. Lesson: Judges 6:1-8:35. Devotional reading: Psalm 93:1-6.

Explanations And Comments

Gidson: The Force Reduced by Three Hundred. Judges 7:1-5. Still the force was too large. Gidson brought the sword to the water and there tested them further. All but three hundred bowed down upon their knees to drink that is as the Hebrew is said to mean strictly, to dip of a great lady whose life water. Three hundred of them carried the sword to their mouths and there they drank. Gidson directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Fearful and trembling, they were lacking in that most important soldierly quality, courage. Gidson did not inspire them with courage, he simply laid them out on their backs and there they died, thus picking them out of the scene altogether.

The Force Reduced to Three Hundred. Judges 7:1-5. Still the force was too large. Gidson brought the sword to the water and there tested them further. All but three hundred bowed down upon their knees to drink that is as the Hebrew is said to mean strictly, to dip of a great lady whose life water. Three hundred of them carried the sword to their mouths and there they drank. Gidson directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Fearful and trembling, they were lacking in that most important soldierly quality, courage. Gidson did not inspire them with courage, he simply laid them out on their backs and there they died, thus picking them out of the scene altogether.

Recommending. Judges 7:1-5. With his sword, Gidson returned to the Midianite camp to reconnoiter. Two men were sleeping, and one was telling his dream. He had seen a man in a white robe, and he was telling his dream. He had seen a man in a white robe, and he was telling his dream. He had seen a man in a white robe, and he was telling his dream.

The Effect of the Strategy. Judges 7:19-22. The plan was carried out. The Midianites were surrounded, and not knowing where to turn, they were taken by surprise. The Queen's Mother

Countess Of Strathmore Preserved Simplicity In Her Home

The Countess of Strathmore in all she did preserved the simplicity and dignity of a great lady whose life was centred in her faith and in her home.

Her tastes were simple; she took a keen interest in gardening and needlework, and round the border of the Countess of Strathmore's life was a tapestry of the most exquisite tapestries. One of the most cherished heirlooms at Glamis is the great bed in which "Bonnie Prince Charlie" slept. When its rose satin canopy fell to pieces with age the Countess had it replaced by a new one.

She brought up her family without "frills," and there was always a homely atmosphere in the feudal castle at Glamis, set amid a background of hills, lochs, heath and moorland, where our Queen spent her childhood. The Countess of Strathmore was a little girl to sew and cook like any good Scots maid, and when war turned Glam

AMAZING FLIGHT ROUND THE WORLD BREAKS RECORD

Howard Bennett, airport, N.Y., said Hughes, quiet, multi-millionaire sportsman, and his four adventurous companions cut the round-the-world record in half, flying a 14,824-mile circuit in three days, 19 hours and 14 minutes.

Near the breaking point as the ship landed, Hughes disclosed that the first time two facts he did not hint in his radio broadcasts during the flight—that faulty maps nearly wrecked a tragic finale to the aerial Odyssey in Siberia, and that on the Atlantic stretch his gas supply had been "barely good" to reach Paris.

If the flight had continued at night on the Pacific, Hughes originally planned, he said, the plane might have crashed into jagged mountains the height of which he had incorrectly recorded on the maps.

"It's a good thing I didn't try to fly out of Yakutat at night," the lucky Texan said with relief.

"The maps we had show there are no mountains higher than 6,000 feet. We measured the mountains as we passed over them the next morning. They were 9,700 feet high and covered with snow."

Stubble-bearded and groggy with exhaustion, the five daring airmen climbed stiffly down from their great baton-topped ship to their companions who surged against police cordons to acclaim their feat. Diredy disheveled, their faces were lined with fatigue.

But they had clipped almost four days from the time made by the late Wiley Post in his solo dash from the same field in 1933. Post flew over virtually the same route in seven days, 15 hours and 46 minutes. He averaged 85 miles an hour on elapsed time, while Hughes and his companions stepped it up to approximately 101.

Among Hughes' first words as he left the plane, wearing the same battle-brown hat, baggy gray slacks and soiled white shirt in which he left New York at 4:20 p.m. M.S.T. Sunday, were:

"Never again!"

He had been asked whether he would attempt such a flight again.

"Hughes' big, twin-motored monoplane was greeted by a tumultuous roar as it twice circled the field at 11 a.m. M.S.T.

Although he had flown 772 miles less than Wiley Post, he had set a mark amazing for its speed and acclaimed by airmen throughout the world.

Despite elaborate police precautions the milling throngs surged through and prevented Hughes from getting within 100 feet of the Wiley Post memorial, on which he had been expected to lay a wreath. Police officials had to place the wreath there later.

Building Airplanes

Work To Be Started In Canada As Early As Possible

London—An air ministry official said that as little time as possible will be lost before the actual work starts on building airplanes in Canada for the Royal Air Force.

It is understood sites for the factories have not yet been chosen. The official said unless none unforeseen hitch develops necessary preliminary will be disposed of quickly.

The same source was wary about mentioning any figure in connection with the amount the government would spend for planes manufactured in Canada, but said £200,000,000 (\$100,000,000) would be "on the high side."

The first step to be taken will be the despatch to Canada of the air mission announced in the House of Commons.

Departure Delayed

Lord Tweedmouth To Remain In Britain Until Mid-September

Ottawa—Lord Tweedmouth, governor-general, will delay his departure from Great Britain to Canada until mid-September, Prime Minister W. L. Mackenzie King announced.

His Excellency's tour of western Canada, planned for this fall, will be postponed until next spring, Mr. King said. Lord Tweedmouth sailed from Quebec July 1 and was expected to return here in August.

To Edit Vancouver Paper

Winnipeg—W. L. McCreary, former managing editor of The Winnipeg Tribune, was honored by 300 citizens in a complimentary luncheon and has been named to Vancouver to become editor-in-chief of The Daily Province.

Britain's Food Supply

Agricultural Production Greater In Value Than Any Of The Dominions

London—After a spirited House of Commons debate on Prime Minister Chamberlain's agricultural policy, the government emerged victorious by a vote of 240 to 137.

A motion by Liberals to reduce the ministry of agriculture's appropriation, in effect a motion to ensure the government's policy, was rejected, with five suggestions abstained from voting.

The food supply debate resulted from Mr. Chamberlain's speech at Fetterley, July 2, when he declared that any attempt by British agriculture to achieve war-time self-sufficiency in foodstuffs would be detrimental to the nation's trade with empire and foreign countries and would also be impractical.

Defending the government, W. S. Morrison, minister of agriculture, declared Great Britain had made progress in reducing the volume of imported foodstuffs.

Despite its small territory, Britain's agricultural production is greater in value than that of any of the dominions, Mr. Morrison said. Remaining in the world's 50,000 tractors in the United Kingdom, the minister of agriculture observed that though the rural population had declined, there had been no reduction in production.

If weather continued favorable, Mr. Morrison said, the next wheat harvest would be the best since 1922. The richness of agriculture after the war, he said, was due to "measures to protect the farmers against dumping, to which the farmer is entitled."

Selling Ancestral Castle

Earl Of Egmout Will Buy Or Build Another Home

Southern Ontario—The Earl of Egmout, Alberta rancher, sailed unexpectedly for New York after announcing he would sell his ancestral home in Hampshire, Avon castle, and would initiate proceedings to lease him to take his seat in the house of lords. He was accompanied by the Countess of Egmout.

Lord Egmout, who succeeded to the title in 1922 from his father, a rancher at Fridley, Alta., for 20 years was killed in an automobile accident. He had been intended to take up residence at Avon castle. He arrived in England in May.

Lord Egmout said the cost of renovating the castle at Ringwood would be so great he had decided to sell it and search for another home or build one.

War Spirit Slackens

Japanese War Minister Says Ardent To Weaning Days

Tokyo—Japan's war minister, Lt.-Gen. Seisairo Itagaki, was quoted as uneasy over a slackening of the nation's war spirit and fearful that munitions supplies were not being replenished sufficiently.

Touching on the problem of war supplies Itagaki declared "the replenishment of munitions is not being carried out as fully as required owing to the difficulty of obtaining important raw materials and the insufficiency of productive facilities."

Western Air Mail

Daily Service To Be Inaugurated On August 1st

Brandon, Man.—Daily air mail service between Winnipeg and Vancouver would be inaugurated Aug. 1, according to an announcement by W. F. Lough, district director postal service.

The mail planes, flying seven days a week, will leave Winnipeg at 11:30 p.m. C.S.T., and arrive at Vancouver 5:20 a.m. P.S.T. The return trip, they are scheduled to leave at 7 p.m. C.S.T., and arrive in Winnipeg at 3:20 a.m.

Stops would be made at Regina and Lethbridge, Lough said. There will be no stop at Calgary, pending completion of airport improvements there.

Calgary Sheep Awards

Calgary—Ontario and Manitoba exhibitors obtained the top awards as sheep judging started at the Calgary exhibition and stampede.

The leading exhibitors were F. W. Garney, Paris, Ont., and R. B. Hunter, Winnipeg, in the Shropshire class.

Other winners were G. W. Boyd and Girls' Club and S. Crossman, Winnipeg, in the Oxford division. 2264

BRITAIN PLANS TO PROCURE AIR BOMBERS HERE

London—To enter negotiations with the Canadian aircraft industry for manufacture of large bomber aircraft in Canada, a new British air mission to the Dominion is being despatched here, the House of Commons was informed.

Announcement was made by Sir Kingsley Wood, secretary of state for air, who revealed the mission would be headed by Sir Hardman Lever, who from 1919 to 1921 financial secretary to the treasury and later a director of Imperial Airways.

Several weeks ago the first British air mission toured the United States and visited Canada. The work of the mission, headed by J. G. Weir, was largely exploratory.

Growing importance of Canada in Great Britain's defence plans is indicated by the fact that less than a week ago it was disclosed in the House of Commons that the British air secretary at the air ministry, who went to the Dominion to investigate possibilities for arranging training of R.A.F. pilots here.

Other members of the second mission are marshal of the Royal Air Force, Sir Edward Ellington; Handley Page, chairman of the Society of British Aircraft Constructors; and A. H. Self, second deputy air secretary at the air ministry, who was a member of the first mission.

In his statement in the house, the secretary said for air said the mission would be "for the purpose of entering into negotiations with the Canadian aircraft industry for the manufacture of large bomber aircraft in Canada."

The announcement was taken in Ottawa as an indication the first air mission had convinced the British air ministry of the ability of Canadian firms to handle orders for large bombing planes.

When the first mission was in the Dominion, Defence Minister Ian Macdonald said, the mission was to enable members of his staff brought the visitors into contact with representatives of 10 manufacturing plants. It was estimated that time that Great Britain might spend about \$250,000,000 in Canada on plans over a period of four or five years.

Penitentiary Changes

General Ormond To Be Removed From Post

Ottawa—An order-in-council abolishing the position of superintendent of penitentiaries was made public by the acting justice minister, Hon. P. J. C. Carlin. It will be effective in a month and will remove from public service Brigadier-General D. M. Ormond, whose dismissal was recommended by the recent royal commission on penitentiaries.

Two other orders provided for the transfer of Inspector J. D. Dawson of the penitentiaries branch to the office of controller of revenue in Ottawa; and for the appointment of George E. Shortt of Ottawa to the Kingston inspectorship.

No provision has been made for General Ormond's successor but an announcement on this point will be made later in the month when Justice Minister Lapointe returns from his holiday.

Western Trip Delayed

Prime Minister Has Postponed His Visit Until September

Ottawa.—Prime Minister Macdonald King said after cabinet council that his long-projected visit to western Canada, including his constituency in Prince Albert, Sask., will be delayed until some time in September.

"I am going to stay here and try to get some work done," the prime minister said, when asked his plans for the summer months.

At the end of July the prime minister will go to the Port Henry, Ont., celebration and Aug. 18 and 19 he will join with President Roosevelt in opening the new Thousand Islands bridge at Ivy Lea, Ont., and the new international bridge at Sarnia, Ont. On Aug. 24 he will be host to Lord Stanbury, secretary of state for the dominions, who is coming to Canada to open the Canadian National exhibition at Toronto.

By-election in the vacant federal ridings of London and Waterloo South will not be called until autumn, Mr. King said.

Mr. King said, "I am going to stay here and try to get some work done," the prime minister said, when asked his plans for the summer months.

ADVERSE BALANCE OF TRADE PROVES WORRY TO BRITAIN

London—Great Britain should insist that the countries whose products she buys should pay for them, the Federation of British Industries declared. The federation is fighting for a reduction in Britain's increasing adverse balance of trade.

The statement listed three major difficulties facing Great Britain's export trade:

Refusal of certain foreign countries for which the United Kingdom is a valuable market to reciprocate by buying substantial quantities of British manufactured goods.

Competition in Britain and other countries which buy British goods from products whose manufacture is subsidized by other governments.

Competition from goods produced in countries where the standard of living is much lower than in the United Kingdom.

The federation recommended:

Continued insistence on reciprocity in negotiating with foreign countries that the United Kingdom is unprepared to grant most favored nation status to countries which do this to the United Kingdom unless the other nation is prepared to reciprocate by buying substantial quantities of British industrial products.

Failing a satisfactory agreement with the countries mentioned, the government should withdraw most favored nation treatment and apply higher duties on the goods of the country in question.

Command Of Sea Vital

Britain Has To Depend On Fuel Supplies From Abroad

London.—The Earl of Peverness, parliamentary secretary to the minister of commerce, said in the house of lords in behalf of the government, said Great Britain could not be entirely self-sufficient with respect to food supplies.

Britain imports 77 per cent. of its wheat, 50 per cent. of its meat and 59 per cent. of the butter its population consumes. These figures could be lowered, Lord Peverness stated, but they could not be reduced to nothing.

"We must depend on supplies of food from abroad," he declared. "Command of the sea is as vital to the interests of this nation as it ever has been."

Western Broadcasting

To Erect Powerful Station In Saskatchewan To Serve Western Provinces

Ottawa.—Hon. C. D. Howe, minister of transport, announced an order-in-council authorizing the construction by the Canadian Broadcasting Corporation of a 50,000-watt broadcasting station in Saskatchewan to serve the prairie provinces.

It will be one in a chain of high-powered stations, he declared, which have already been announced by the broadcasting corporation. Cost of the new station is expected to be around \$250,000. The location of the new station has not been decided.

Guerrilla Fighting

Numbers Wounded In Clash Between Arabs And Jews

Jerusalem.—An undetermined number of persons were wounded in a clash between Arabs and Jews in the mixed quarter of Haifa.

Rifle fire echoed through the streets as the two groups hurled stones and other missiles at each other, but no deaths were reported. Many Jews were evacuating the district.

A recapitulation of casualties since July 5 showed: 66 Arabs and 26 Jews killed; 146 Arabs, 96 Jews and five British soldiers wounded. Many others were wounded in guerrilla fighting.

A World Record

Claimed For Cow At Government Training Farm In Australia

Sydney, Australia.—A world record in milk and butter fat production for 273 days is claimed for Betty Levey, an Illawarra Shorthorn cow, at the government dairy training farm at Berry. Her figures are: 13,611 pounds of milk and 618.24 pounds of butter fat. The 273-day record of the famous Melba Ltd. Shorthorn, which holds the world's record cow of all breeds, was 13,510 pounds of milk and 587 pounds of butter fat.

Howard Hughes, millionaire movie producer and sportsman, and two of his aides. Hughes is shown center, with Navigator Harry Connor, left, and Radio Man Richard Stoddart. Photo was taken just before the flight commenced.

previous record was 496 strokes,

"They tell me you have a model
husband, Mrs. Hicks?"

"Yes, sir, but 'e ain't a workin'
model."

"At any rate, I'm not double-faced,"
said Mrs. Gossip to her neighbor an-
gryly.

"Well, I know that. If you were you
wouldn't come out with that one,"
came the reply.

Mother: "Tommy, what did you do
with the twopenny I gave you for tak-
ing your medicine?"

Tommy: "I bought a bun with one
penny and gave Lilly the other to
drink my medicine."

The Girls: "I should think you'd feel
happy as a king when you're in the
air."

Aviator: "Happier. I'm an ace."

Bilton (sternly): What's the reason
that young man stays so late when he
calls?"

Miss Bilton (demurely): I am, papa.

A wag, who thought to have a joke
at the expense of the Scotch provision
dealer, said: "Can you supply me with
a yard of pork?" "Sandy," said the
dealer to his assistant, "give this gen-
tleman three pigs' feet."

Johnnie: "Say, pa, I can't get these
rhetoric examples. Teacher said to
find the common advisor."

Pa. (in disgust): "Great Scott,
haven't they found that thug yet?
Why, they were hunting for it when
I was a boy."

Stout Lady, to little boy: "Can you
tell me if I can get through this gate
to the park?"

Little Boy: "I guess so. A load of
hay just went through."

"Did you go on a honeymoon, Suz-
anne?"

"Ah, suppose you might call it that,
ma'am. Henry done help me wid de
washin' de first week."

"Oh, pal?"

"Yep."

"When Noah was on the Ark, why
didn't he kill these two pesquitos
when he had such a good chance?"
